## Safety Compliance

At Auspoint we are fully committed to ensuring a safe workplace for its employees & continually striving to improve safety and performance.

Our team recognise that in order to achieve an outstanding safety performance at its best, we must have a proven safety system, committed management and a pro-active workforce.

All employees of Auspoint Electrical Services and sub-contractors are fully engaged in the system and are made aware of their responsibilities through company and project inductions, on and off- site meetings, Safe Work Methods (SWMS) and / or Job Safety analysis Assessments (JSA).

## Project Capacity

Auspoint Electrical has comprehensive experience in delivering Electrical, Communications and Security Projects and Services to our clients throughout Melbourne.

We are a small business with the expertise and experience giving us the capacity to complete projects of all sizes. Auspoint seeks to become involved in projects as early as possible throughout the design and construct phases. The sooner Auspoint is involved, the greater the ability to influence design outcomes. This enables us to reduce projects costs and reduce delivery time through value engineering.

All work is completed by our experienced workforce who have the technical capability, training and competencies appropriate to task. With their knowledge of current standards, regulations and codes of practice, clients can be assured of receiving trusted advice and quality work. Combined with our competitive rates, we offer a value for money service on all projects.
